## TWO TRAINS

Blown to Pieces by ar **Explosion** of Powder.

## **DEAD NUMBER 22**

Thirty-five People Were Injured-Three Passenger and Eight Freight Cars Were Demolished.

Terre Haute, Ind., Jan. 21 .- Twenty two charred, broken and mutilated bodies were taken from the smoulder ing ruins of the accommodation pas senger train on the Big Four railroac following its destruction Saturday night by the explosion of a carload or powder as it passed a freight train at Sandford, Ind., nine miles west of Terre Haute. The number of injured will total at least 35.

The cause of the dispater has not been fully explained, as several theo-ries are advanced. The result was terrible. The shock was felt for 36 miles, many believing it to be an earthquake. The three coaches of the passenger train were filled. The entire train, including the locomotive was blown from the track, the coaches were demolished, the engine hurled 50 feet and the passengers were either blown to pieces, consumed by fire or rescued in injured condi-

Some of the 35 injured will die The most severely hurt are in hospitals at Terre Haute and at Paris, III. Several others are cared for at Sandford. The full extent of the disaster was revealed at daylight, but the death list will not be complete until workmen have cleared the debris and the injured are out of

danger. According to the trainmen of the freight, the explosion of the powder was caused by the concussion of the passenger train, which was slowing down for Sandford. Another theory is that gas escaping from an oil pipe line entered the powder car standing over the pipe and that a spark from the passenger locomotive ignited the

The belief was expressed by one or two persons that the disaster was due to the act of a tramp or an intoxicated man who may have fired a shot into the car.

Besides the passenger train eight freight cars were torn to pieces by the explosion. Huge masses of iron were found hundreds of feet from the track. The tank of the passenger locomotive was hurled a hundred feet landing in a gravel road. The wrecked train of eight freight cars was consumed by fire which broke out in the wreckage. The other freight cars were pulled out of danger. Not a building in Sandford escaped damage

The accommodation passenger train was running from Indianapolis to Mattoon, Ill. It was a dark night further Sunday by the announcement and heavy rains had converted the that a vote will be forced on his elecstreets and tracks at Sandford into a tion Tuesday and that subsequently pond. The residents were going to he is to be proven guilty of certain and lights in many of the house had been extinguished when the to resign his senatorship. freight train drew in on a sidetrack friends claim he will insist upon a to let the passenger go by. Shortly hearing to any person who has afterwards the passenger train ap charges to make. The Batley followproached the station, setting brakes as it passed the freight train.

As the passenger train was just abreast of the powder car the contents of the car exploded. The entire passenger train was blown from the tracks into the air and crashed to the earth a tangled mass of wood and steel, beneath which lay 40 human beings. Fire broke out in the wreckage and before the eyes of citizens and rescuers who rushed from their homes, many burned to death.

By the glaring light of the burning coaches the people of Sandford did car and was entirely consumed. their best for the wounded. The residents of the village threw open their homes to the injured and worked heroically all night

Cries of the injured and the crackling of the flerce flames greeted the rescuers, who worked frantically, but soon were forced back by the terrible

Under the wreckage of the baggage car was found a charred torso bearing a lineman's belt and tools about the waist. Four mutilated bodies were found in a wood several hundred feet from the tracks.

A thousand feet of track was torn up and a great hole shows where the powder car stood. This car was bound from Concord Junction, Mass. to East Alton, Ill., and contained 500 kegs of

powder. Engineer Welch and Fireman Jar red, of Mattoon, Ill., who were on the passenger locomotive, were hurled

100 feet and fell in a muddy field.

The explosion and fire destroyed telegraphic communication and Sand ford with its catastrophe was alone hours. The first news to reach Terre Haute was brought by those who walked the distance to procure help. Relief trains with physicians

and supplies were started at once and they took 32 of the injured to Paris Ill., and brought seven to Terre Gale Ruined a Weak's Work.
